

ROUSH CleanTech is collaborating with Alliance AutoGas to provide a complete alternative fuel program for America's fleets. Building on ROUSH's long-standing history of technical excellence, they have partnered with Alliance AutoGas to bring the most comprehensive fueling solution to fleets.

THE PROGRAM HAS THREE CORE COMPONENTS:

1. Consult- Helping fleets identify the best propane autogas fueling solution for their vehicles
2. Equip- Providing everything fleets need to make shifting to autogas easy and affordable
3. Support- Ongoing training and technical support to ensure a fleet's autogas program is a success

THE ALLIANCE AUTOGAS FUELING SOLUTION INCLUDES:

- + Spill-free, zero-emission fueling station at base
- + No implementation cost for fleet fueling station
- + Guaranteed fuel supply
- + Optional autogas data integration with fuel management systems
- + Comprehensive autogas education includes extensive safety and operational training
- + Ongoing autogas fueling support and training
- + 24-hour safety support
- + Green branding message support

Alliance AutoGas partners provide a single point of contact to guide fleets through the process, from installing the fueling station at a fleet's home base, to managing fuel supply, to ensuring fleets have the ongoing training and support they need.

Fueling with Alliance AutoGas is a simple, cost-effective way to displace thousands of gallons of gasoline with clean-burning, American-made autogas. Our state-of-the-art fueling stations can be implemented quickly and scaled easily; so as your autogas fleet grows, your infrastructure can too. To learn more:
